

What I like	To make it perfect
Nice slow session well suited for the time of the day (after lunch)	More than one person can do coding at a time
Nice first time experience with Fitnessse	
The full circle from user story to AT on paper to Fitnessse to production code	
Code intensive. It gave me good idea of what is involved in using Fitnessse	
Time boxing was also good	
These were my first steps into Fitnessse. You've made me want to set up Fitnessse on Wednesday	This session was too short
