

What I like	To make it perfect
The exercise (3)	Less presentation, more discussion & hands on
Discussions & interactions (5)	More questions to stimulate discussion
Retrospective	More exercises to stimulate discussion
Session focusses on the important issues	More practical examples
Session focusses on problems of architects in agile environments	Provide examples on how presenters apply their theory
Session focusses on evolving architectures	Provide link with concept "Technical Debt"
'Out of spot' problems & discussion	Keep track on time
Good & clear presentation (3)	Provide better exercise
Easily to understand, approached to practical situations	Use better english (3)
New perspective	Make more time for presentation and exercise
Involvement of audience	More examples of real practice
Well prepared	Present faster
Good session	Present more dynamically and interactively (2)
Hands on	More practice, less theory
	Skip the example at the beginning (agile and waterfall are known issues ...) (2)
	Slide with "Challenges" too theoretical (practice is different)
	Answer the question "how the convince the management not to assign an ivory tower architect?"
	Focus on the solution for the conflict between architectuur and agile
	Talk more about the architecture, and less about the architect
	Speak louder
