

What I like	To make it perfect
Slides are very nice Great content Great to have something completely different from the rest of the sessions!	Live demo would be cool So much info that it's hard to conceive it all A bit more interactivity. Maybe you should separate the theory a bit more from the tools
Lots of info about tools	Explain motivation for this work more clearly Examples
Lots of practical info in a domain relatively unknown to me Good slides	Maybe add some more interactivity
TDD for devs and sysadmins	More time!
