

Rating	What I like	To make it perfect
9	Real life (non IT) examples Goal directed reasoning from the solution backwards Easy to take home	Some moderation to help the audience get the most out of the exercises (coaching exercise) allow observers to interrupt once or twice, if the coach digresses/gives suggestions or judgment
7	Coaching exercise on solution-solving very well set up and useful Handout was great 3 concrete methods suggested Observer role very good	Start off with some quick questions to participants on why they are there Slides in the beginning were a bit long Miracle to solution transition not clear
8	Interactive Practical Good speaker	Some more real-life examples
8	Really hands-on	
7	Great speaker Confident -> makes it easy to keep focus	Subject is rather complicated. Two hour session is too short
6	New approaches to coaching and helping find solution. I liked the team exercise, observer role particularly	I would like more discussion on the types of questions to ask – felt this was not clear
8	New approach in solving problems. Very interesting	More feedback on role plays. Maybe walking around and listening to the plays and give feedback on what you saw
8	Thinking in a different way about getting towards the solution (no more “why’s”)	A bit more guidance in the exercises
7	New way of thinking, practical exercises, interactive	More practical examples before starting exercises -> to make techniques more clear
9	Very applicable	More time to discuss exercises
8	Good interaction Speaker knows his subject thoroughly Mind shift	Have some example problems at hand so no time is lost looking for them
8	Lecture then exercises	Short film showing coach & client example
7	Open my mind, learned to think in a different perspective	Use some video to show some use cases at the end of the session to understand more clearly
7	Change the mind to focus from the problem to the solution	Real examples where it was applied

7	Some new/interesting techniques to approach problems	Limit the coaching to a specific context: customers or development team and provide more real life examples
6	The clear explanations of the techniques	To provide more concrete examples from problem to solution Provide some basic problems to help exercises start going Group bit too large for personal feedback during exercises
8	The exercises, the not too complex, the quiet approach of the coach (I would have fear)	Make it a little bit shorter if needed
8	Both the theory and the workshop part	I would have liked to see some examples in detail of successful application of these techniques. Perhaps a staged role playing demo or a video
8	Taught "holding back", open questions, client focus, difference between consult, trainer and coach	More examples how to elicit options + move toward solution envisioned (focus on systemic + circular, but how to talk options?) Team showed describe "8" together, else not all same expectations! (scales)
9	Very inspiring Exercises Directly applicable	Do exercises in smaller group and get feedback from expert
8	Excellent techniques	
9	Brilliant ideas explained Very understandable P. proves it works during his assistance in the exercises	Try to stay away from the "that depends on your coaching skills" but try to give some hints or share some experience of situations wherein you solved the question
9	Nice images underlining the content! Short instructions for powerful exercise with colleagues	If my exercise partner would have spent more time 😊
7	New insights: didn't know about solution space approach	One practical exercise where teacher is observant in public?
10	Great presenter! Dialogue during presentations Slides with only clear key messages Exercises were great Super!	Mini-handout about/with the key elements -> Just one card, maybe this format

8	The knowledge of the speaker The exercises The style of the speaker The presented examples	Like to learn even more practical techniques/games
8	Good interaction, good to be able to try it	Real life examples of where it was used
7	The experience of the speaker The examples (real time) he provides The exercises	Propose *concrete* problems for the exercises... (I know it is against the ???)
7	Lots of interaction, very good presenting skills, not too many slides, lots of energy	Demo by presenter with member of session as a real problem
7	Good balance theory/practice	Hand real-life examples to work with instead of letting participants imagine one
9	Techniques to apply in daily life	Maybe suggest some problems to avoid problem being too large or too small?
